- Room: Booth 1725

Come to the Navy STP Booth (1725) for demonstrations of innovative research being done by various small businesses. The Navy STP (Navy SBIR Transition Program) has been a long-standing vehicle for connecting SBIR/STTR-funded technologies with warfighters, government acquisition and technical personnel, prime contractors, system integrators, and other potential partners and collaborators. The program takes a holistic approach to assisting selected small businesses transition their technologies through business mentoring, training, marketing material creation, and business development activities and promotion.
